

I'm not robot

Continue

the black chin you'd get a minion next to the boss and you'd throw chins at the minion that the chin is tucked into just the protection of theminion which is much lower than the bosses so you're going to be hitting like a huge number on the boss it's the quickest way to take it a little expensive but much faster which means more item drops more pet chances per hour. Taking it back about four years ago when Lord Warsdonjon came out I was one of the first players in the game to get Armagh Hill that I sold for \$130-5 million which is no longer the Kaysani anymore, the AGS is about 14 million GPs, but good news armadillo's chest and chain skirt are worth well over 35 million each. Most of your profit is indefinitely to come from the chain skirt and chest and you might even know to keep killing the servants if you were to kill enough bosses you'd have one chance out of 16,000 drops of the rate from getting pippa mignon's piece item and that's true even for any kind of god wars dungeon boss as well. I feel like most of the high-class players are mostly still PVM so the arms and skirt boxes are worth so much and fewer players actually go pk, plus, the AGS is a special weapon, but there are draconian claws, there are G Moles and Ballistas and other weapons that you don't need the AGS in addition to the AGS it's like the worst god's word to use PVM's wiseo so the armor is more equal and the AGS is worth less. The killing of Kree'arra comes out on 3.4m GP per hour. Coming in second most camp boss at the old schoolrunescape at this very moment, Vorkath.Now Vorkath is amazing gold but it's locked behind the 2quest Dragon Slayer and it's definitely quite difficult you probably won't make this journey if you know under 100 battle. Using Dragon Hunter Dragon Hunter Archery Lance is very much going to grow your kills per hour using their vessels and is about 30% more accurate and 30% more damage towards dragons. Each kill takes about two minutes but it drops 2 excellent dragon bones at once and both are valued at about 12k GP so it's about 25K and killing one just like a base drop. While you killed that boss, you're probably going to cross the forgery phase, it's something cruel. You've got to keep moving or you're going to get Coke Squike from Zurg Bullets hit about 30 each tick and of course you know about Vox, he invented vox's walk, where you make the balls back and forth, you go ticking and moving every second it's very extreme even when I try to do it I'm still dead but if you do master it's going to reinforce your GP and profit and kill an hour like very much you can kill probably another five hour while doing itVorkath was compared to Zolera many times as you know it Solo but I would say many players especially those at a higher level indefinitely say that Vorkath is lighter and it is more gold so if you already know there was a Zolara under your belt I would definitely move towards that boss. Warth will reach 3.6m an hour. All right, before we get into the best GP per hour in the whole game, I want to give a lot of respectable mentions, and go through them really quickly, you know some money makers who didn't quite get to the snout of this video. The first mention should be Corpbeast with the team or doing this FFA which says free for all you can find a clanchat called FFA Corp 07, I use a little bit of it I actually have like 3,000 kills with this clan chat hour GPper ranges from 1.m and easily over 4m GP which is very much a dependency on your RNG. You can get like three violets inside 200 KC I saw the guy get Elisian for killing a seventh which is crazy next would be the infamous desert revival. It may be one of the best money makers in the game all game but you need a lot of skill you can even kill them 30 in the desert necessary, so you can telestantly if you see someone you might even want to have 85 agility with the summer pie as well and then you can jump on the agility shortcut down south and never die. There are a lot of ways to do it effectively, but most players don't have to come here just because it's the wilderness that there are a lot of tricks in the skull, it's undermined that there are so many people you know who come in and out of clans. Teams so definitely be careful it's not forever one up will be a dealer, or diversify or invest and many players don't like it they don't really know about it they just don't like it man. But it's one of the best doctors in the whole game at 100% that I've industryed billions of golds while I sleep most of the time I do something else in the game I actually kill bosses I do a run on a farm while I make money in the background. The next honourable mention will be fighting at risk nor for everyone you need a lot of PK skills I mean I've been Pking for a long time and I still get trashedon sometimes people are so damn good but you can definitely do as a 500nversus 500n risk to fight and if you're good at it you can make an unforgettable amount of gold. Next up will be joining a barbaric attack team or running team arnecraft are pretty hard to find you know you might want to look around on Twitter on reddit maybe some forums But it's amazing that you just ran an essence for people trying to electrify a 99 runecrafting you'd need 75 runecrafting for a big bag but I've seen people pay anywhere from 2 to 6m per hour perrunner that's very expensive which means if you run you can do some GP. The latest recognition will be the acquisition of a battle team with the elite or the hard-pressed Warrock diaries. Come to think of it it takes 10 seconds to beam to Varrock and go to a staff store you're earning 148k at a time leading 54million GP an hour and of course it's inconsistent you can only do once a day but I mean if you do it every day for two years you're going to rake in some serious cash just like that. Ok here it's a lot of you probably guessed it's the blood theatre coming in 1st place you definitely have to find a group of friends to teach you a theatre of blood or you can spend you know how many hours watching YouTube videos looks guests and I promise you'll probably learn how to do it. You can have up to 5 players in total on your team but it is considered definitively that the 4-person is the most effective. If you or any of your teammates died during your raid the GP per hour will drop quite a bit. In order to complete the blood theater aka Raids 2 you are going to need a lot of very expensive equipment I would say at least 500 million GPminimum you are also going to need some very reliable intelligent teammates you definitely want to be on disc or teamspeak just have the top level communication. Of course the discriminatory rescue is the best item you can get in pies 2 and it used to be about four billion GP so up to 2bthen up to 1.3 to 1.4b was very stable for acouple months but in the last month it just crashes it at like 900m. Another common decline is Avernicdefender which is an upgraded draconian meter basically that's the highest level and it's still worth over 70 million it's very stable so it's another good drop and it's the most common drop you'll see inside the blood theatre. Once again the GP per hour has so many variables you know how many times you die how effective you are how well your friends are Rng your drobrates all these things but with everything said and done it's about 6.4m GP an hour. Top 10 silver recipients in the top 100 in the top 100. If you have some free time on your hands and feel free to go check out the twitch as well as I'll be live-streaming almost every day, mind asking any questions and maybe seeing how I mactually do most of my gold while I play the game and you can also send me a message on Twitter or Instagram on SerzLive. I hope this video has added some value and you know you're inspired to keep practicing and keep grinding out those levels to kill some bosses making a ton of gold in the runescape. I hope they have a great day don't forget upstairs and sign up if you're in a new peace! Out.
